

Sawawee Sareh-esor

Senior Cloud Infrastructure & Platform Engineer

Bangkok, Thailand | +66 92-799-4723 | zawawee37@gmail.com | LinkedIn: www.linkedin.com/in/sawawee-sarehesor-esor-0883b8b2

Professional Summary

Cloud Infrastructure & Platform Engineer with over 8 years of experience across enterprise IT support, cloud infrastructure, platform engineering, and hybrid environments. Experienced in AWS, Microsoft Azure, Oracle Cloud Infrastructure, Linux, Windows Server, Terraform, CI/CD, and enterprise infrastructure operations. Currently responsible for coordinating enterprise infrastructure delivery from requirement gathering, technical solution review, implementation planning, production readiness, and operational handover. Strong interest in AI-enabled engineering with practical knowledge of AI Solution Design, AI Agents, LLMs, Retrieval-Augmented Generation (RAG), Local LLM deployment, and AI-driven workflow automation.

Core Competencies

- AWS • Azure • OCI • Hybrid Cloud • Linux • Windows Server • VMware
- Terraform • GitHub Actions • GitLab CI • Jenkins • Docker • Kubernetes
- Microsoft SQL Server • MySQL • Networking • DNS • Firewall • IAM
- Platform Engineering • Incident Management • Production Support • Infrastructure as Code
- AI Solution Design • AI Agent Concepts • LLMs • RAG • Prompt Engineering • MCP Concepts • Local LLM

Professional Experience

Hybrid IT Specialist (Emerging Technology) | Fujitsu (Thailand) | May 2025 – Present

- Gather infrastructure requirements from application teams for enterprise cloud projects.
- Review infrastructure solutions across AWS, Azure, Hybrid Cloud, and Private Cloud environments.
- Coordinate project delivery from requirement gathering through implementation and production handover.
- Review infrastructure sizing, cloud subscriptions, implementation costs, and operational readiness.
- Work with Infrastructure, Cloud, Security, Network, and Application teams to deliver enterprise solutions.
- Coordinate firewall, network, access management, and security compliance activities.
- Support Application Security Testing (AST), vulnerability remediation, and production readiness.
- Prepare technical documentation, implementation procedures, and operational handover documents.
- Track project progress, SLA, and customer satisfaction.
- Leverage AI tools to improve reporting, documentation, and engineering productivity.

System & Cloud Engineer | Toyota Connected Asia Pacific | 2023 – 2025

- Supported AWS and Azure production environments for enterprise applications.
- Administered Linux and Windows Server infrastructure.
- Automated infrastructure using Terraform and Infrastructure as Code.
- Built and maintained CI/CD pipelines using GitHub Actions and GitLab CI.
- Performed monitoring, troubleshooting, incident investigation, and root cause analysis.
- Worked with Infrastructure, Security, and Application teams during production deployments.
- Implemented security best practices including IAM and network segmentation.
- Applied AI-assisted automation to improve operational efficiency.

System Engineer | Vintcom Technology | 2021 – 2022

- Implemented enterprise server infrastructure and virtualization solutions.
- Supported Oracle Linux, Red Hat Enterprise Linux, Solaris, VMware ESXi, Oracle VM, and SAN storage.
- Performed installation, migration, troubleshooting, and system administration.
- Developed automation scripts to improve operational efficiency.

IT Support Engineer | Lenovo / Dell Project (Malaysia)

- Provided enterprise technical support for business users.
- Diagnosed hardware, software, and operating system issues.
- Delivered remote support while meeting SLA commitments.

Selected Projects

- Enterprise Infrastructure Delivery

Coordinated infrastructure projects across AWS, Azure, Hybrid Cloud, and Private Cloud from requirement gathering through production readiness.

- AI Infrastructure Concepts

Designed AI-powered solution concepts using AI Agents, LLMs, RAG, Local LLM deployment, and workflow automation to improve enterprise operations.

Professional Certifications

- AWS Certified Solutions Architect – Associate
- AWS Certified SysOps Administrator – Associate
- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Oracle Cloud Infrastructure Foundations Associate

Professional Training

- Kubernetes & Amazon EKS
- Splunk Administration
- Ubuntu & Oracle Linux Administration
- AI, LLM, RAG and AI Agent Concepts

Technical Skills

Cloud: AWS, Azure, OCI

Infrastructure: Linux, Windows Server, VMware, Networking, DNS, Firewall

DevOps: Terraform, GitHub Actions, GitLab CI, Jenkins, Docker, Kubernetes

Database: Microsoft SQL Server, MySQL

AI: AI Solution Design, AI Agents, LLMs, RAG, Local LLM, Prompt Engineering
